## **AGOSCI National Tour 2010 Launceston**

### **Autism and AAC : Research to Practice**

Presented by  
**Dr Joanne Cafeiro**

**Target Audience: parents, teachers, speech pathologists, occupational therapists and other support staff**

This workshop will detail the characteristics of individuals on the Autism Spectrum and how these characteristics interface with the features of Augmentative and Alternative Communication. Evidence-based practices will be illuminated in case studies. The augmented input strategies for individuals from first diagnosis to adulthood will illustrate the practical applications of AAC as a life enhancing tool. Case studies will include natural aided language, visual supports, adapted literacy and curricula, behavior management, interaction building, keyboard communication and pivotal response treatments. Each case study will include practical tools, strategies and data collection systems with videos to make each study come alive. Workshop participants will have the opportunity to design their own AAC interventions in a problem solving format.

To get more information contact your State Representative through the website:
